

Peer-Graded Assignment: Complete Healthcare Technology Prospecting Playbook

Learning Objectives

After completing this project, you will be able to:

- Develop healthcare-focused ICPs and buyer personas.
- Apply the TIMD framework to qualify opportunities.
- Design multi-channel outreach strategies.
- Prioritize accounts and territories effectively.
- Conduct structured discovery conversations using SPIN questioning.

Assignment Overview

This final project assesses your ability to integrate prospecting, qualification, outreach, territory management, and discovery skills into a single professional deliverable.

You will act as a healthcare technology sales professional responsible for building a repeatable prospecting strategy for a growing healthcare technology provider.

Your task is to create a Complete Healthcare Technology Prospecting Playbook that demonstrates strategic thinking, practical execution, and professional judgment throughout the sales development process.

Scenario

You have recently joined MedFlow Technologies, a healthcare technology company that provides patient engagement and workflow automation solutions to hospitals and health systems. The company is expanding into new regional healthcare markets and needs a repeatable prospecting strategy to identify, qualify, and engage decision-makers across complex healthcare organizations.

As a Sales Development Representative (SDR) or Business Development Representative (BDR), your responsibility is to create a complete prospecting playbook that helps the sales team:

Identify ideal healthcare buyers.

Prioritize opportunities.

Conduct effective outreach.

Manage territories strategically.

Lead productive discovery conversations.

Your completed playbook will serve as a practical guide for prospecting and relationship-building activities within healthcare technology sales.

Project Format

Title: Complete Prospecting Playbook for Healthcare Technology Sales

Format: Single PDF document (maximum 15 pages)

Total Points: 100 points

Submission Requirements:

- Clearly label and professionally format all the sections.
- Include a brief introduction explaining your overall approach.
- Use a professional business communication tone throughout.
- Proofread for grammar, spelling, and clarity.

Project Components

Your playbook must include all five components outlined below.

Each component is worth 20 points.

Part 1: Healthcare ICPs and Personas (20 points)

Task: Develop detailed Ideal Customer Profiles (ICPs) and personas for three healthcare buyers.

Required Personas:

IT Director: Technology decision maker responsible for evaluating systems, security, integration requirements, and technical feasibility.

Clinical Leader: End-user champion (for example, Chief Nursing Officer, Department Head) focused on workflow impact, patient outcomes, and staff adoption.

Executive Leader: Economic buyer (for example, CFO, COO) concerned with ROI, budget allocation, strategic alignment, and organizational priorities.

Each profile must include:

- Demographics and role context

- Key challenges and constraints

- Professional goals

- Buying triggers and motivations

Part 2: TIMD Qualification Framework (20 points)

Task: Customize the TIMD qualification framework for healthcare technology sales.

Required Deliverables:

- Healthcare-specific qualification criteria
- Scoring rubric for opportunity prioritization
- Red flag indicators for disqualification
- Decision process mapping for hospital systems

Part 3: Multi-Channel Outreach Toolkit (20 points)

Task: Create a complete set of outreach assets aligned to your personas.

Required deliverables:

- 3 cold calling scripts (one per persona).

- 5 email templates: initial outreach, follow-up, value proposition, case study, and meeting request.

- LinkedIn outreach sequence (5 messages + engagement strategy).

- Referral request templates.

Part 4: Territory and Account Management (20 points)

Task: Design a territory and account management approach appropriate for healthcare markets.

Required deliverables:

- Account prioritization matrix

- Territory coverage model

- Relationship mapping template for complex hospital systems

- 90-day activity plan

Part 5: Discovery Call Resources (20 points)

Task: Create tools to support effective discovery conversations.

Required deliverables:

- Discovery call structure and agenda
- SPIN questions customized for healthcare
- Objection handling guide
- Follow-up email template

How Your Project Will Be Evaluated

Your project will be evaluated by peers using the following rubric. Each component is worth 20 points (100 points total).

1 ICP Development (20 points)

Exemplary (17-20 points):

Demonstrates exceptional depth of healthcare persona research.

Shows clear understanding of distinct priorities across IT, Clinical, and Executive roles.

- Buying triggers and challenges are specific and realistic.

- Professional presentation suitable for portfolio use.

Proficient (13-16 points):

- Shows solid understanding of healthcare stakeholder roles.

- Appropriate differentiation between personas with relevant examples.

- Generally professional presentation with minor gaps.

- Most elements present and well-developed.

Developing (9-12 points):

- Basic understanding evident but lacks depth or specificity.
- Limited healthcare context or generic examples.
- Presentation needs improvement in organization or clarity.
- Some elements missing or underdeveloped.

Needs Improvement (0-8 points):

- Minimal effort or understanding demonstrated.
- Lacks healthcare relevance or appropriate customization.
- Poor organization, formatting, or completeness.
- Major elements missing or inadequate.

2 Qualification Framework (20 points)

Exemplary (17-20 points):

- Thoughtful customization of TIMD for healthcare buying process.
- Practical scoring methodology with clear thresholds.
- Comprehensive disqualification criteria.
- Demonstrates understanding of complex healthcare decision-making.

Proficient (13-16 points):

- Solid application of TIMD framework to healthcare.
- Reasonable scoring approach with some specifics.
- Clear disqualification indicators.
- Shows understanding of healthcare buying dynamics.

Developing (9-12 points):

- Basic TIMD application with limited customization.
- Generic scoring without healthcare context.
- Limited disqualification criteria.
- Surface-level understanding of healthcare decisions.

Needs Improvement (0-8 points):

- Minimal customization or effort.
- Scoring rubric missing or inadequate.
- No clear disqualification criteria.
- Little understanding of healthcare buying process.

3 Outreach Materials (20 points)

Exemplary (17-20 points):

- High-quality scripts and templates with strong personalization.
- Compelling value propositions tailored to each persona.
- Professional tone and structure throughout.
- Complete set of all required assets.

Proficient (13-16 points):

- Solid outreach materials with appropriate customization.
- Clear value propositions with relevant examples.
- Generally professional presentation.
- Most assets complete and usable.

Developing (9-12 points):

- Basic outreach materials lacking depth.

- Generic value propositions with limited personalization.

- Presentation needs improvement.

- Some assets missing or incomplete.

Needs Improvement (0-8 points):

- Minimal effort in asset creation.

- No meaningful personalization or value articulation.

- Unprofessional or incomplete.

- Multiple assets missing.

4 Territory Planning (20 points)

Exemplary (17-20 points):

- Strategic account segmentation with clear criteria.
- Realistic coverage model with sound rationale.
- Clear prioritization logic aligned with resource allocation.
- Actionable 90-day activity plan with specific targets.

Proficient (13-16 points):

- Solid account tiering approach.

- Reasonable coverage model.

- Logical prioritization method.

- Generally actionable activity planning.

Developing (9-12 points):

- Basic segmentation lacking depth.
- Coverage model needs more specificity.
- Unclear prioritization logic.
- Activity plan vague or unrealistic.

Needs Improvement (0-8 points):

- No clear segmentation strategy.
- Coverage model missing or inadequate.
- No prioritization framework.
- Activity plan absent or meaningless.

5 Discovery Resources (20 points)

Exemplary (17-20 points):

- Excellent SPIN questions specific to healthcare context.
- Logical conversation flow and call structure.
- Comprehensive objection handling with strong responses.
- Professional documentation throughout.

Proficient (13-16 points):

- Good SPIN questions with healthcare relevance.

- Clear call structure.

- Solid objection handling coverage.

- Generally professional presentation.

Developing (9-12 points):

- Basic SPIN questions lacking healthcare specificity.

- Call structure needs development.

- Limited objection coverage.

- Presentation needs improvement.

Needs Improvement (0-8 points):

- Generic or inappropriate questions.

- No clear call structure.

- Minimal objection handling.

- Unprofessional or incomplete.

Peer Review Instructions

Review the submitted playbook and assign points for each of the five components based on the rubric criteria above. Add the points from all five components to determine the total grade (maximum 100 points).

When reviewing, consider:

- Is the work professional and portfolio-ready?

- Does it demonstrate an understanding of healthcare sales contexts?

- Are the deliverables complete and well-organized?

- Does the playbook reflect sound judgment and practical application of course concepts?

Final Note for Learners

- Use course frameworks as practical decision-making tools rather than checklists.
- Make reasonable assumptions where information is not provided.
- Demonstrate professional judgment and prioritization.
- Focus on quality, relevance, and practicality over length.
- Ensure all components work together as a unified prospecting strategy.

A strong submission should clearly show how a healthcare sales professional would identify, qualify, engage, and advance opportunities within a complex healthcare buying environment.

Summary

In this project, you learned that:

- The playbook integrates prospecting, qualification, outreach, territory, and discovery into one deliverable.
 - Healthcare buying involves three distinct roles: IT, clinical, and executive leaders.
 - Each of the five components carries equal weight at twenty points.
 - Course frameworks work best as decision-making tools rather than checklists.
 - A strong playbook shows how professionals identify, qualify, engage, and advance opportunities.
-
